SUMMARY

Applied LLM Engineer specializing in agentic AI systems, multi-agent orchestration, structured tool calling, and production-grade GenAI automation for enterprise workflows. Experienced in LangChain, LangGraph, LLM fine-tuning, evaluation pipelines, and AI safety frameworks.

WORK EXPERIENCE

BusinessNext (Acidaes Solutions Pvt. Ltd.)

Noida, Uttar Pradesh

AI Engineer

Jun 2025 – Present

- Designed and deployed a **production-grade LLM agent** for CRM email automation using **LangChain**, improving support response efficiency by **35%** across enterprise workflows.
- Built a centralized **LLM evaluation dashboard** using **DeepEval** to monitor hallucination, latency, safety, and adherence metrics across **5 production models**.
- Integrated **Guardrails-AI** into LangChain microservices to enforce action constraints and output validation, reducing incorrect model executions by **40%**.
- Fine-tuned **LLaMA** and **Mistral** models for reliable **structured JSON tool calling** across multiple enterprise services.
- Implemented end-to-end **conversation logging, telemetry, and analytics pipelines** to track agent behavior, failure patterns, and user interactions across **10+ agent instances**.
- Architected **8 autonomous multi-agent workflows** for CRM business processes, increasing adoption of agentic AI capabilities by **25%**.

BusinessNext (Acidaes Solutions Pvt. Ltd.)

Noida, Uttar Pradesh

Junior AI Engineer

Jan 2025 – Jun 2025

- Designed and deployed a **Scrum Master AI agent** to automate sprint ceremonies, backlog analysis, and cross-team coordination for a 6-member AI delivery team.
- Automated summarization and analysis of **50+ Azure Board tickets** per sprint, generating actionable sprint insights and blocker reports for leadership review.
- Built a **QA Automation AI agent** to generate 200+ test cases directly from pull-request diffs and trigger CI-based automated testing workflows.
- Fine-tuned **LLMs for structured tool calling**, improving argument prediction accuracy by **30%** and strengthening CRM system integration reliability.
- Generated **10,000+ synthetic records** using **SDV** and augmentation pipelines to enable safe model training while preserving customer data privacy.
- Researched and implemented **multi-agent coordination patterns** including task orchestration, delegation, and tool routing, improving workflow execution efficiency by **20%**.

SKILLS

LLM & Agentic AI: LLM tool calling, multi-agent orchestration, prompt engineering, RAG pipelines, evaluation with DeepEval

Frameworks & Libraries: LangChain (v1), LangGraph, HuggingFace Transformers, PyTorch, Scikit-learn

Production & AI Safety: Guardrails-AI, FastAPI microservices, Docker, Kafka-based automation, MLflow experiment tracking

Data & Engineering: Python, Pandas, NumPy, SQL, Git version control, technical documentation, Agile/Scrum collaboration

EDUCATION

CHRIST (Deemed to be University), Bangalore, Karnataka — Master of Computer Applications

Jul 2023 – Apr 2025

Vellore Institute of Technology (VIT), Vellore, Tamil Nadu — Bachelor of Computer Applications

Jul 2020 – Apr 2023

CERTIFICATIONS

Build Real World AI Applications with Gemini and Imagen Skill Badge – Google

Apr 2025

Skills: Generative AI, AI Product Development

Inspect Rich Documents with Gemini Multimodality and Multimodal RAG – Google

Apr 2025

Credential ID: 15335595 — Skills: Multimodal AI, Retrieval-Augmented Generation (RAG)

IBM Exploratory Data Analysis for Machine Learning – IBM iX

Jun 2023

Skills: Machine Learning, Data Analysis for AI Decision-Making
