SUMMARY

Applied LLM Engineer specializing in agentic AI systems, multi-agent orchestration, structured tool calling, and production-grade GenAI automation for enterprise workflows. Experienced in LangChain, LangGraph, LLM fine-tuning, evaluation pipelines, and AI safety frameworks.

WORK EXPERIENCE

Dentsu <i>Gen AI Engineer (Hybrid)</i>	Bengaluru, Karnataka May 2026 – Present
- Built a low-latency AI Voice Assistant with real-time speech-to-text, multilingual conversations, streaming LLM inference, and text-to-speech, enabling seamless voice interactions for enterprise applications. - Developed an AI-powered video generation platform using Gemini, VEO, Imagen, and multi-agent workflows to automate creative brief analysis, storyboard generation, asset management, and scene continuity for marketing campaigns. - Designed and implemented agentic workflows for creative automation, orchestrating AI agents for character consistency, prompt optimization, asset retrieval, and end-to-end video production. - Integrated RAG, vector search, tool calling, and cloud storage into AI applications, enabling context-aware retrieval, scalable knowledge retrieval, and production-ready GenAI workflows. - Collaborated with cross-functional product, engineering, and creative teams to deliver enterprise-grade GenAI solutions, optimizing AI workflows for scalability, reliability, and business impact.	
BusinessNext (Acidaes Solutions Pvt. Ltd.) <i>AI Engineer</i>	Noida, Uttar Pradesh Jan 2025 – Apr 2026
- Built and deployed multiple LLM-powered agents for CRM automation, QA generation, sprint management, and enterprise workflow orchestration using LangChain and custom agent frameworks. - Fine-tuned LLaMA and Mistral models for structured tool calling, improving argument prediction accuracy by 30% and enabling reliable CRM integrations. - Developed a centralized LLM evaluation and monitoring platform using DeepEval, tracking hallucination, latency, safety, and adherence metrics across production models. - Implemented Guardrails-AI, telemetry, analytics, and conversation monitoring pipelines, reducing incorrect executions by 40% and improving agent observability. - Architected 8+ multi-agent workflows for business automation and researched advanced coordination patterns including task delegation, orchestration, and tool routing.	

SKILLS

LLM & Agentic AI: LLM tool calling, multi-agent orchestration, prompt engineering, RAG pipelines, evaluation with DeepEval
Frameworks & Libraries: LangChain (v1), LangGraph, Google ADK, HuggingFace Transformers, PyTorch, Scikit-learn
Production & AI Safety: Guardrails-AI, FastAPI microservices, Docker, Kafka-based automation, MLflow experiment tracking
Data & Engineering: Python, Pandas, NumPy, SQL, Git version control, technical documentation, Agile/Scrum collaboration

EDUCATION

CHRIST (Deemed to be University) , Bangalore, Karnataka — Master of Computer Applications	Jul 2023 – Apr 2025
Vellore Institute of Technology (VIT) , Vellore, Tamil Nadu — Bachelor of Computer Applications	Jul 2020 – Apr 2023

CERTIFICATIONS

Inspect Rich Documents with Gemini Multimodality and Multimodal RAG – Google <i>Credential ID: 15335595 — Skills: Multimodal AI, RAG, Document Intelligence</i>	Apr 2025
Build Real World AI Applications with Gemini and Imagen Skill Badge – Google <i>Skills: Generative AI, AI Product Development, Multimodal Applications</i>	Apr 2025
Develop GenAI Apps with Gemini and Streamlit – Google <i>Credential ID: 15304740 — Skills: GenAI Application Development, Gemini, Streamlit</i>	Apr 2025
Prompt Design in Vertex AI Skill Badge – Google <i>Skills: Prompt Engineering, LLM Optimization, Generative AI</i>	Apr 2025
